[] also recommends that you try to get hold of another book by A. R. Luria, The Nature of Human Conflicts - An Objective Study of Disorganization and Control of Human Behavior. This book was published about 1928 and is apparently quite hard to get hold of. Unfortunately, we have only one copy or we would have included it in this group of papers.

I hope this material will be of some help and if you think of any other way in which we might be of assistance on the intelligence producing side of the business drop me a line or pass the word back through []

I enjoyed the tour with the school immensely. The way in which you laid out your problems and took us into your confidence made me feel that we might make more of a real contribution than the average reserve group ordinarily gets to make while on active duty and I am sure that we all appreciated the opportunity.

Sincerely yours,

William A. Tidwell
